

Controller:in (m/f/d)

Permanent position, Full-time (40h), Münster/Kaiserslautern

At E-Lyte, you have the chance to help build up the Controlling department and thus help shape an important area of our company. You will be part of a start-up company that has made it its business to actively create the future. Our work is far away from "standard" and therefore never gets monotonous. Every single employee at our company is important and can contribute his or her own ideas right from day one. Hierarchy only exists along flat structures. We attach great importance to transparency, so that you not only know what you are doing, but also what you are doing it for.

Your benefits:

- We offer a company pension plan
- We offer a performance-related bonus in addition to your salary
- We promote further training and development wishes
- Employee events at regular intervals are important to us
- We are open to flexible working hours
- With us you have very good chances of career advancement in a short period of time
- We work closely with universities, research institutions and industrial customers from all over the world

Your tasks:

- Setting up structures, systems and processes in controlling
- Analysis of sales and profitability development of E-Lyte to support management decisions
- Leading projects to optimize our controlling tools and to digitalize the finance area
- Cost center / cost unit accounting
- Project controlling (CAPEX/Maintenance/OPEX)
- Project controlling of public funding projects
- Budget and forecast preparation
- Identification, notification and development of proposed solutions for deviations from the current plan
- Implementation and execution of methods for effective progress measurement depending on the size and complexity of a project
- Collaboration with accounting, tax and annual audit departments

Your profile:

- A degree in business administration with a focus on controlling or a comparable qualification
- Professional experience in controlling or a similar field
- Professional experience in a manufacturing company is an advantage
- Enjoy taking on and working on new topics and actively shaping the working environment
- Very good analytical and conceptual thinking skills as well as a strong understanding of data
- Meticulous working style as well as strong communication and teamwork skills
- Very good knowledge of Microsoft Office, especially Excel
- High IT affinity as well as good knowledge of SAP Business One are an advantage

This is E-Lyte Innovations:

We produce and develop electrolyte solutions for modern energy storage systems such as the lithium-ion battery, sodium-ion battery or supercapacitors. If you already know what this is about, optimal! If not, that's not a deal breaker for us.

You can find out more about E-Lyte on our website: <https://e-lyte.de/>.

How to apply:

Tell us who you are, what motivates you and why E-Lyte Innovations is interesting for you. In addition, we need a current CV (curriculum vitae), your desired starting date and your desired salary. Please send everything to: recruitment@e-lyte.de

We are looking forward to your application!
